## Experience/Projects

### MAY 2023 PREDICTION OF STUDENTS PERFORMANCE USING EDUCATIONAL DATA MINING, Warangal

The project's goal is to put into practice a web applica- tion that col- lects student data using a basic Bayesian min- ing technique. One can analyze the student performance graph of success growth using the naïve Bayesian classifica- tion technique. The algorithm creates a student perform- ance prediction graph by using the academic his- tory and personal data of the students as input. The information re- garding the student's strengths and weaknesses is provided by this graph. There are several waysto use thisinformation.
