| 2024- JUNE | RealTime Messenger | Project |
| <ul style="list-style-type: none">Using Node.js and Express.js for the backend and React.js for the frontend, I have developed a real-time chat application.The app enables users to join chat rooms and exchange messages in real time using socket.IO. Authentication is handled with JSON Web Tokens (JWT), and bcrypt.js is used for secure password hashing.For data storage, MongoDB is used, stores user data, chat room details, and messages in a NoSQL format, which is flexible and scalable. <p>Developed using : Reactjs ,Nodejs, Expressjs,MongoDB,Bcrypt-JS, JWT, Chakra-UI, Web-Socket, Socket.IO, Salt-Mechanism
