## Work Experience/ Projects

2024-JAN **JobFit - Resume Scanning Model** [Project-Link](#)

- Designed and implemented an NLP-based resume Scanning model and hosted it using Streamlit, automating the categorization of resumes into specific job profiles.
- Ensured the application's Performance remained robust and Responsive even with an increasing volume of data, supporting Organizational Growth.
- Achieved 98% accuracy through rigorous testing and validation on diverse datasets.

2023-AUG **Free VPN app** [Project-Link](#)

- Developed a Free VPN app where users can choose and connect to available VPN servers, and view connection details like speed, location, IP address, and postal code.
- Used GetX for state management of the app and Hive database for storing VPN data in cache.
- Added Light/Dark theme toggle and Lottie animations for enhanced visual appeal.

2023-JULY **Cilima** [Project-Link](#)

- Developed Cilima, a modern weather app displaying live weather data and city-specific forecasts.
- Built using Flutter and Dart, with weather data fetched via API integration.

2023-NOV **Note Hub - Notes Platform** [Project-Link](#)

- Designed and developed a website using React as a Google Notes clone, enabling efficient note-taking and task management.
- Implemented a user-friendly interface with React components and utilized CSS for styling, creating a visually appealing and responsive design, ensuring performance.

## Achievements/Certifications

JULY 2024 **Draft Indian Standard Publication** [Link](#)

- Published Draft Indian Standard on Disposable ECG Electrode Standards at BIS.

2024-AUG **HackOdisha Consumer Track Winner** [Hackathon](#)

- I secured first place at HackOdisha's Consumer Track for developing an NLP-based resume scanning model that achieved 98% accuracy.

## Position of Responsibilities

2023-NOW **Mess Secretary - GGC** [HMC-NITR](#)

- Elected Mess Secretary, managed logistics, and improved cafeteria services using data-driven decisions.
