Data Structures and Algorithms Object-
Oriented Programming Database
Management Systems

Project

AUGUST 2023 **TextUtils**

[GitHub](#) | [Website](#)

- This project is designed to analyze textual data by counting the number of characters and words, and estimating the reading time. It consists of modules that break down the text, calculate the reading time, and provide a user interface to display the results.
- This tool is beneficial for individuals looking to improve their reading speed or professionals needing to analyze large volumes of text quickly.
- The application is built using React JS and BootStrap%.

FEBRUARY 2023 **Basic Calculator**

[GitHub](#) | [Website](#)

- Developed basic calculator using JavaScript to perform arithmetic operation.
- Implemented a user-friendly interface with buttons for numeric input and operators, allowing users to easily perform calculations
- The application is built using JavaScript .

Achievements

JULY 2023 **codechef**

- Have solved over approx **100** problem and **15** contest in which improvement is going on and have a rating of **12,47**
